Quite difficult and a really great concept, very much worth it.. I wanted to like this game but it turned out exactly as I feared.

Instead of doing 1 genre right it does 2 poorly. The bullet hell and typing mechanics are at constant odds with one another. The bullet hell is pretty bland and simple and the typing is mostly nonsense words. The only difficulty comes from the lack of time during a fight to frantically move your hands to a typing position and get a word or 2 out. Learn to type 1 handed or use a controller with your feet for maximum potential. If you think you'd enjoy having to type scrambled Latin while also having to swat away a constant barrage of bees with your hands this game is for you.. i played the demo and i like it, now i get the full game and the pixel, the music, enemies, its Freaking Awesome!!!!, a must have !!! This, ladies and gentlemen, is a really great game! The perfect mix of bullet hell, with a typing game, dystopian 199X Rome setting, supernatural horror, and a classic 90's look that reminds me of Dreamweb! Challenging, addicting, nerve wracking and overall fun! Probably you won't get all the hidden references if you are not Italian but still is a really great game that can be entertaining to everyone! Great work guys!. This game's strongest point is the immersion and I am now interested in learning Latin.
